

**API AMMO LOCK- aliphatic amine salts liquid**  
**MARS FISHCARE NORTH AMERICA, INC**

*Disclaimer: This drug has not been found by FDA to be safe and effective, and this labeling has not been approved by FDA. For further information about unapproved drugs, click here.*

-----

**Drug Label**

**BENEFITS:**

Promotes healthy gill function and eliminates fish stress caused by ammonia.

Detoxifies ammonia, chlorine and chloramines.

**DIRECTIONS:**

Use the API Dosing Cap on Bottle.

Add 5 ml per 10 U.S. gallons (38 L) of aquarium water.

Add every 2 days until ammonia is not detected.

If, after 7 days, ammonia is still present, perform a partial water change, service your filter and reduce feeding.

**TIP:**

AMMO LOCK does not remove ammonia; it converts it to a non-toxic form. So, even though the ammonia is in a safe, non-toxic form, aquarium water will still test positive for ammonia until it is removed by the biological filter.

This veterinary medicine is marketed in accordance with the Small Animal Exemption Scheme. Keep cap tight. Store below 100 F (38 C). Contains 17% Aliphatic Amine Salts. For animal treatment only. Keep out of reach of children. If swallowed, immediately give 2 glasses of water and induce vomiting. Call a physician. In case of contact with skin or eyes, immediately flush with water for at least 15 minutes. Call a physician. Disposal of unused product: wrap bottle in newspaper and discard in home waste. Expires 12 months after opening. Manufacturing Authorization: SAM0004.
